Betrifft: Brightstocköl von Zeitz

Das uns kürzlich von Thnen zugegangene Muster Brightstocköl von Hydrierwerk Zeitz haben wir entsprechend der telefonischen Rücksprache mit Ihrem Herrn Dreyer in unserem Zentrallaboratorium untersucht. Die Viskosität dieses Musters entspricht der des uns in Juli direkt vom Hydrierwerk Zeitz zugegangenen Musters. Wir geben Ihnen nachstehend die beiden Ahanlysendaten in einer Geenüberstellung, woraus Sie entnehmen können, daß beide Proben ungefähr die gleichen Analysendaten aufweisen. Der Conradsontest int unzulässig hoch. Auch fällt die hohe Nz und Vz auf.
